SUMMARY

Results-driven Software Engineer with experience building scalable full-stack applications using modern web technologies. Adept at delivering clean, maintainable code and implementing best practices to solve complex problems collaboratively. Passionate about innovation, optimizing user experiences, and driving impactful solutions in dynamic team environments.

EXPERIENCE

Full Stack Software Engineer | Lumen Technologies | Remote | April 2021 – December 2023

- Led the development of internal productivity tools that reduced capital expenditure and improved operational workflows, resulting in more efficient processes and cost savings across multiple departments within the organization.
- Collaborated with business units and developer teams to align goals, ensuring successful project outcomes by facilitating effective communication, strategic planning, and coordinated execution of project deliverables.
- Deployed over 100 use cases for UiPath-integrated web applications, enhancing user engagement by leveraging RPA bots for task automation and streamlining repetitive processes to increase overall efficiency.
- Mentored junior developers, fostering a culture of continuous learning and professional growth, improving team performance, and contributing to a more innovative and collaborative work environment.

Front End Software Engineer | CenturyLink | Denver, CO | September 2018 – April 2021

- Developed enterprise web applications within an agile framework to enhance business processes, ensuring rapid delivery of high-quality software solutions that aligned with organizational objectives and user needs.
- Designed and optimized user interfaces across multiple projects using front-end technologies on Java backends with SQL and NoSQL databases, improving functionality and visual appeal for diverse user groups.
- Revamped existing application interfaces to improve performance and user experience, resulting in increased user satisfaction and engagement through more intuitive and responsive design elements.
- Led the end-to-end process from mockups and wireframes to testing, ensuring cross-browser compatibility and a seamless user experience through meticulous planning, execution, and quality assurance practices.

PROJECTS

Open-Source Work | Bitcoin Ecosystem | January 2024 – Present

- Contributed to open-source projects in the Bitcoin space, collaborating with key community members.
- Developed features for StratumProtocol.com (SV2) website. Assisted SeedSigner in getting listed on Bitcoin.org website.
- Actively seeking further opportunities to contribute to the Bitcoin community.

SKILLS

Programming Languages: JavaScript/TypeScript, Java, Python, SQL

Frameworks & Libraries: React, Next, Tailwind, Express, Vue, Django, Flask, Spring Boot, Jasmine

Tools: Jira, Git, CI/CD, Jenkins, Docker, Kubernetes, Cloud Computing, Postman, Figma
